Slide A: lightning update (week 5) · Slides 1–6: final presentation (week 9)

INSTRUCTIONS

How to use these templates

Mid-point clinic (week 5)

- Use slide A only.
- One team member presents it in 2 minutes.
- Fill in the four boxes; keep the text short.

Final presentation (week 9)

- Use slides 1 to 6 (maximum 6 slides, 5 minutes).
- Every team member presents a part.
- Submit the slides and the dashboard on the website before the session.
- Keep the AI-use note on slide 6.

SLIDE A · MID-POINT CLINIC

Team name · members and universities

QUESTION
Our research question in one sentence, ending with a question mark.

DATA
Indicators (name and code), countries and years.

FIRST RESULT
One chart or one number, with one sentence of interpretation.

MAIN PROBLEM
The one thing we want help with today.

SLIDE 1 · TITLE

Our title: the finding in a few words

Team name
Members: name (university) · name (university) · name (university)

Research question, in one sentence.

Tip: a title that states the finding ("Richer countries are more digital, but Spain beats its income") is better than a topic ("Digitalisation").

SLIDE 2 · QUESTION

Why this question matters

Spain
Why it matters here: one or two facts.

Slovakia
Why it matters here: one or two facts.

Montenegro
Why it matters here: one or two facts.

SLIDE 3 · DATA

Data: what we used and what was missing

Indicators: name, code, unit, source.
Countries: … Years: …
Number of observations: n = …

Gaps and what we did with them (changed year, left out, interpolated, other source).

SLIDE 4 · METHOD AND RESULT

Main result, written as a sentence

Your key chart (one message, title = the finding, units, year, source; Spain, Slovakia and Montenegro highlighted).

Method used and why.

Key number(s), e.g. coefficient and p-value, accuracy, variance explained, number of clusters.

SLIDE 5 · DASHBOARD

Our dashboard

Screenshot of the dashboard.

Link to the dashboard (or "PDF submitted on the website").

SLIDE 6 · CONCLUSIONS

What we found and what we learned

Three findings, one line each.

Limits: sample size, gaps, association not causation.

What we learned from working in an international team.

AI use: which tool, for what, and how we checked the result (or "We did not use AI tools").
